100 YEARS WRITING INSTRUMENTS BY WALDMANN

- HANDMADE BY MASTER CRAFTSMEN -

Waldmann's writing instruments are distinguished by their unique surfaces and quality.

Waldmann writing instrument manufacturing was founded in 1918 in Pforzheim, the German jewellery metropolis with a rich tradition in the Black Forest, as the production site of writing instruments made from gold and silver by Adolf Waldmann. At that time the "simple" pencil was the standard writing instrument for the majority of the population. Adolf Waldmann had the idea of upgrading these modest pencils with decorative metal shells made from gold and silver. The pencil could then be rolled or twisted out of the metal shell depending on the mechanism. The skilled workers needed for the job, such as engravers, embossers, polishers, toolmakers, jewellery fitters and chasers were easy to find in the jewellery town of Pforzheim and the surrounding areas. The production range also included everyday accessories such as pocket mirrors, toothpicks, cigarette holders and was expanded in 1921 with the production of fountain pens. In 1937 Waldmann's patented invention of the 4-coloured mechanical pencil was awarded the silver medal for Design and Functionality at the World Exhibition in Paris. This was one of the many patents that the Waldmann firm developed in the writing instrument industry. During an allied air raid on Pforzheim on the 23rd February 1945 the factory building belonging to the Waldmann family was also completely destroyed. This was a very great loss for the company, as not only the entire production facility was destroyed, but also all of the technical drawings and archived samples. Despite this harsh setback, Adolf Waldmann, along with what remained of his colleagues, built the company back up quickly after the war so that already in March 1946 production could commence again on a new site.

A new era began at the start of the 1950s for the Waldmann company too, with the invention of the ball pen refill.

At that time, as well as today, Waldmann manufactured writing instruments for many world-famous companies from all sectors under their names or manufactured limited editions for special occasions, for example the 150th anniversary of the sailing competition “America's Cup” in 2000 or as official supplier of an extravagant writing tool for the Byron Nelson Professional Golf Competition in the USA. All winners from the past 15 years, including Tiger Woods, Phil Mickelson, etc. received this writing instrument from the tournament organisers. In 2002 Waldmann could even be admired on screen! In Stephen Spielberg's film “Catch me if you can” with Hollywood stars Leonardo DiCaprio and Tom Hanks, the original 2 coloured mechanical pencil, already patented in the fifties, was also commended with a role.

For the honour of German “Sports Legend” in 2012, 7-time Formula One World Champion Michael Schumacher was honoured with a specially manufactured writing instrument from Waldmann. It was of course nothing less than a piston fountain pen, made from solid sterling silver 925, adorned with flawless diamonds. The sophisticated writing instruments made by Waldmann are also generously used for other awards. As a result, in 2016 German journalists who contributed to the uncovering of the “Panama Papers” were awarded with a Waldmann EDELFEDE fountain pen.

As was also the case in the founding year, Waldmann still manufactures 100% of its products at its production site in Germany, and therefore all Waldmann products rightfully carry the “Made in Germany” mark. Despite intermediate introduction of modern technology, the old, traditional production methods used to produce Waldmann writing instruments have been kept and on average 73% of the manufacturing is done by pure craftsmanship. Waldmann's own writing instrument collection comprises 15 model series, all produced using solid sterling silver 925, and this therefore makes Waldmann the only manufacturer worldwide of writing instruments that can exhibit its whole collection made up completely of sterling silver 925.

As a specialist for exceptional surfaces, Waldmann has made a name for themselves. The craftsmanship of the engraving is especially noteworthy. The Viennese patterns can only be mastered by very few master engravers and writing instruments with this unique, elegant engraving are only available from Waldmann as unique items. This special feature has already merited TV-appearances on German broadcaster channels ZDF, SWR and Deutsche Welle.

TUSCANY

This series is surrounded by a Tuscan touch. Even the name inspires images of thin cypresses reaching up to the sky. With the elegance of cypresses, the popular Tuscany presents itself with a luxury feel and its rich colour contrast.

FEATURES

- pinstripe pattern with engraving space
- PVD coated chocolate coloured
- solid spring supported clip
- upper part and component parts rose gold plated
- solid sterling silver 925
- 100% made in Germany
- 10 years warranty

PENCIL

- twist action mechanism
- lead: 0,5 or 0,7 mm
- length: 137,00 mm
- weight: 28 g
- diameter: 10,60 mm

BALL PEN

- twist action mechanism
- length: 137,00 mm
- weight: 30 g
- diameter: 10,60 mm

FOUNTAIN PEN WITH GOLD NIB

- iridium tipped 18 ct. '750' gold nib bi-colour
- cap with screw system
- length closed: 141,00 mm
- length uncapped: 105,00 mm
- weight: 38 g
- diameter: 11,70 mm

FOUNTAIN PEN WITH STEEL NIB

- iridium tipped stainless steel nib rose gold plated
- cap with screw system
- length closed: 141,00 mm
- length uncapped: 105,00 mm
- weight: 38 g
- diameter: 11,70 mm

ROLLER BALL

- cap with screw system
- length closed: 141,00 mm
- length uncapped: 118,00 mm
- weight: 42 g
- diameter: 11,70 mm

CONCORDE CAP

- SPECIAL EDITION - WALDMANN ÉPOQUE

For the 100th anniversary, Waldmann presented, as a special edition, the two colour twist action ball pen, which is based on the exact replica from 1958. In 2002 this pen won glory and honour in the American blockbuster 'CATCH ME IF YOU CAN' from star director Steven Spielberg, with included Hollywood top stars Leonardo DiCaprio and Tom Hanks.

FEATURES

- fine barley pattern with engraving space
- riveted steel clip with tension inside
- component parts rhodium plated
- solid sterling silver 925
- 100% made in Germany
- 10 years warranty

BALL PEN

- twist action mechanism
- 2 spare refills blue and red ink colour
- lead: 0,5 or 0,7 mm
- length: 140,00 mm
- weight: 31 g
- diameter: 10,70 mm

ÉPOQUE BALL PEN 4461

- SPECIAL EDITION -
WALDMANN TWO-IN-ONE

In 1972 Waldmann got the patent for the Two-In-One fountain pen and push action ball pen combined as one single pen. In honour of this masterstroke, Waldmann would like to remember this original replica with a special edition.

FEATURES

- fine barley pattern with engraving space
- solid clip with tension inside
- component parts rhodium plated
- solid sterling silver 925
- 100% made in Germany
- 10 years warranty
